

As part of the affiliation between Texas Health Resources (THR) and University of Texas Southwestern Medical Center (UTSW), THR utilizes the UTSW eResearch systems (Velos and eIRB) for all (both local and central/commercial) IRB submissions for THR Human Research Protection (HRPP) review. As a result, investigators and study staff are required to have a UTSW profile. To establish that profile, UTSW requires the below information. Please return the form to HRPP@TexasHealth.org. Please allow 2 weeks for completion of requests.

You will receive an automated email from UTSW when your eResearch Access has been completed. You are not required to take a complete formal classroom eResearch user training before using the system. Directions for submitting studies using UTSW's electronic systems (Velos and eIRB) will be provided. If needed, you may additionally contact Meyad Baghezza for assistance at Meyad.Baghezza@UTSouthwestern.edu or (214) 648-5486.
