- 13 ED Beds

About Texas Health Mansfield

Texas Health has joined with AdventHealth to build a new health care campus in Mansfield, a 4-story, 195,400-square-foot community hospital, called Texas Health Hospital Mansfield and is slated to open in late 2020. The 38-acre campus will be located on the southeast corner of U.S. Highway 287 and Lone Star Road in Mansfield. The two faith-based organizations have a long history of collaboration; in 2012 the two partnered to form Texas Health Huguley Hospital Fort Worth South.

Designed to be a destination for the residents of Mansfield and surrounding communities, the \$150 million project will also include an 80,000-square-foot medical office building that will house primary care and specialty practices, an outpatient center that will offer lab, therapy and imaging services. The hospital will have capacity for 95 beds, and including Medical/Surgical, ICU, women's services, general surgery, orthopedics, interventional cardiology, and gastroenterology.

The Mansfield area is one of the fastest growing areas of North Texas, projected to reach more than 250,000 residents by 2023. Future job growth over the next ten years is predicted to be 41%, higher than the national average of 33.5%. Texas Health Mansfield will bring a one-of-a-kind health care campus and whole person care to this fast growing community.
