

The determination of whether the PI can hold the contract (be the direct recipient of the revenue from the sponsor) depends on whether THR is defined as engaged. If the answer is “**yes**” to a below question, then THR is defined as “engaged” and the revenue would be required to be held by THRE for disbursement to the hospital and PI.

- Is the hospital services portion of the research budget 50% or greater than the entire budget? This does not include standard of care hospital services.
- Is the Principal Investigator a THPG physician?
- Is a Co-Investigator a THPG physician?
- Is the any of the study staff listed on the study a THR employee?
- Is the study being funded by any type of grant? (special conditions may be applied by external agencies – please verify with THRE Grants office)
