

**Here for you. And your safety.**  
We're taking these steps everyday.

Virtual visits for patients available and encouraged

Screening stations provide temperature checks, hand hygiene, and masks

Re-configured seating areas to allow for safe distancing

Increased hand hygiene practices for visitors and patients

Universal masking in place; all patients, visitors and staff wear masks in the practice

Staff self-monitor for symptoms including temperature checks; symptomatic caregivers must stay home

Patient rooms are disinfected between every patient; waiting rooms, chairs, door knobs and other surfaces are cleaned throughout the day

**Texas Health**  
Physicians Group®

**Keeping you safe is our primary concern.  
Working together, we can all stay safe.**
